Belgrade, September 2013

Letter of support to host and organize:

**18th International Conference on Photoacoustic and Photothermal Phenomena – ICPPP18,
2015, in Novi Sad, Serbia.**

Dear colleagues,

The Institute of Physics Belgrade, in cooperation with Institute of Multidisciplinary Research, University of Belgrade, with strategic support from:

Ministry of Education, Science and Technological Development of the Republic of Serbia;
Tourism Organization of Serbia;
Tourism Organization of Novi Sad;

and with valuable assistance from the Serbia Convention Bureau, will provide full support to host and organize the **18th International Conference on Photoacoustic and Photothermal Phenomena – ICPPP18**, to be held in **2015, Novi Sad, Serbia**.

The Institute of Physics Belgrade (IPB) is recognized both in Serbia and the region as one of the leading research institutions. IPB's specific combination of working attitudes, customs and unique spirit has made it a unique European research institution. The institution's human and infrastructural capacity is used in basic science, as well as a generator of technological advances.

The mission of the IPB is to promote knowledge and educate new researchers in the general field of physical sciences and associated technologies, with the aim to bring into successful realization national and global needs of modern society. IPB was founded in 1961, and since then has acquired expertise in a wide number of research areas in the physical sciences and their associated technologies, as well as in supporting areas such as the organization of a variety of international and national conferences, workshops and summer schools (e.g. ESCAMPIG, ICOM, Symposium on the Physics of Ionized Gases – SPIG, Condensed Matter Physics – SFKM).

Research in the fields of photoacoustic and photothermal sciences has been a part IPB research effort for more than three decades. This is one of the reasons why IPB is ready to support Serbia as a destination to host the 18th International Conference on Photoacoustic and Photothermal Phenomena, in 2015. We aim to make this conference successful and memorable.

Sincerely,

Aleksandar Belić
Dr. Aleksandar Belić, Director
Institute of Physics Belgrade
